

AI Agentic Workflows

For Business Analysts

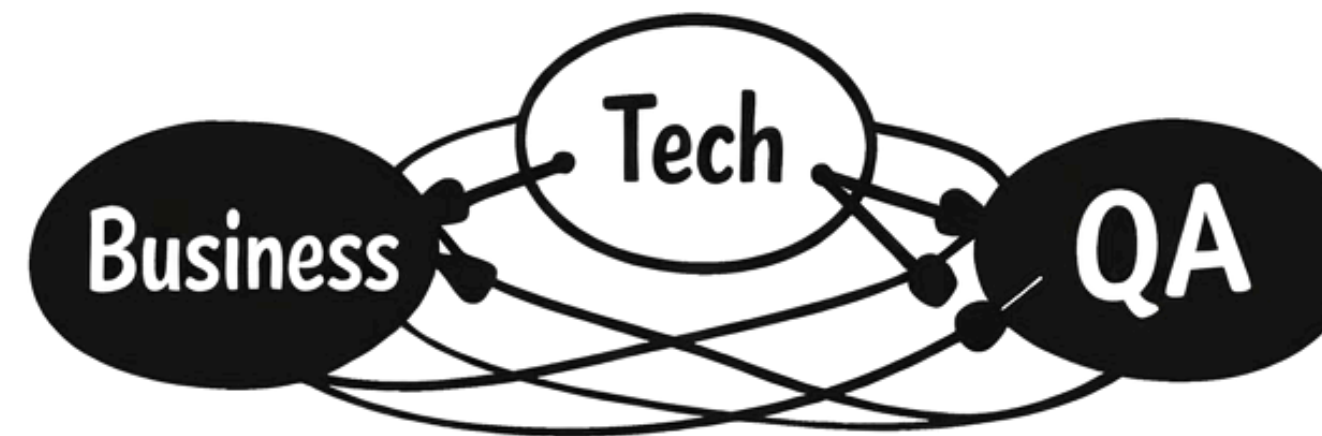

Problem:

Fragmented Analysis → Lost Decisions

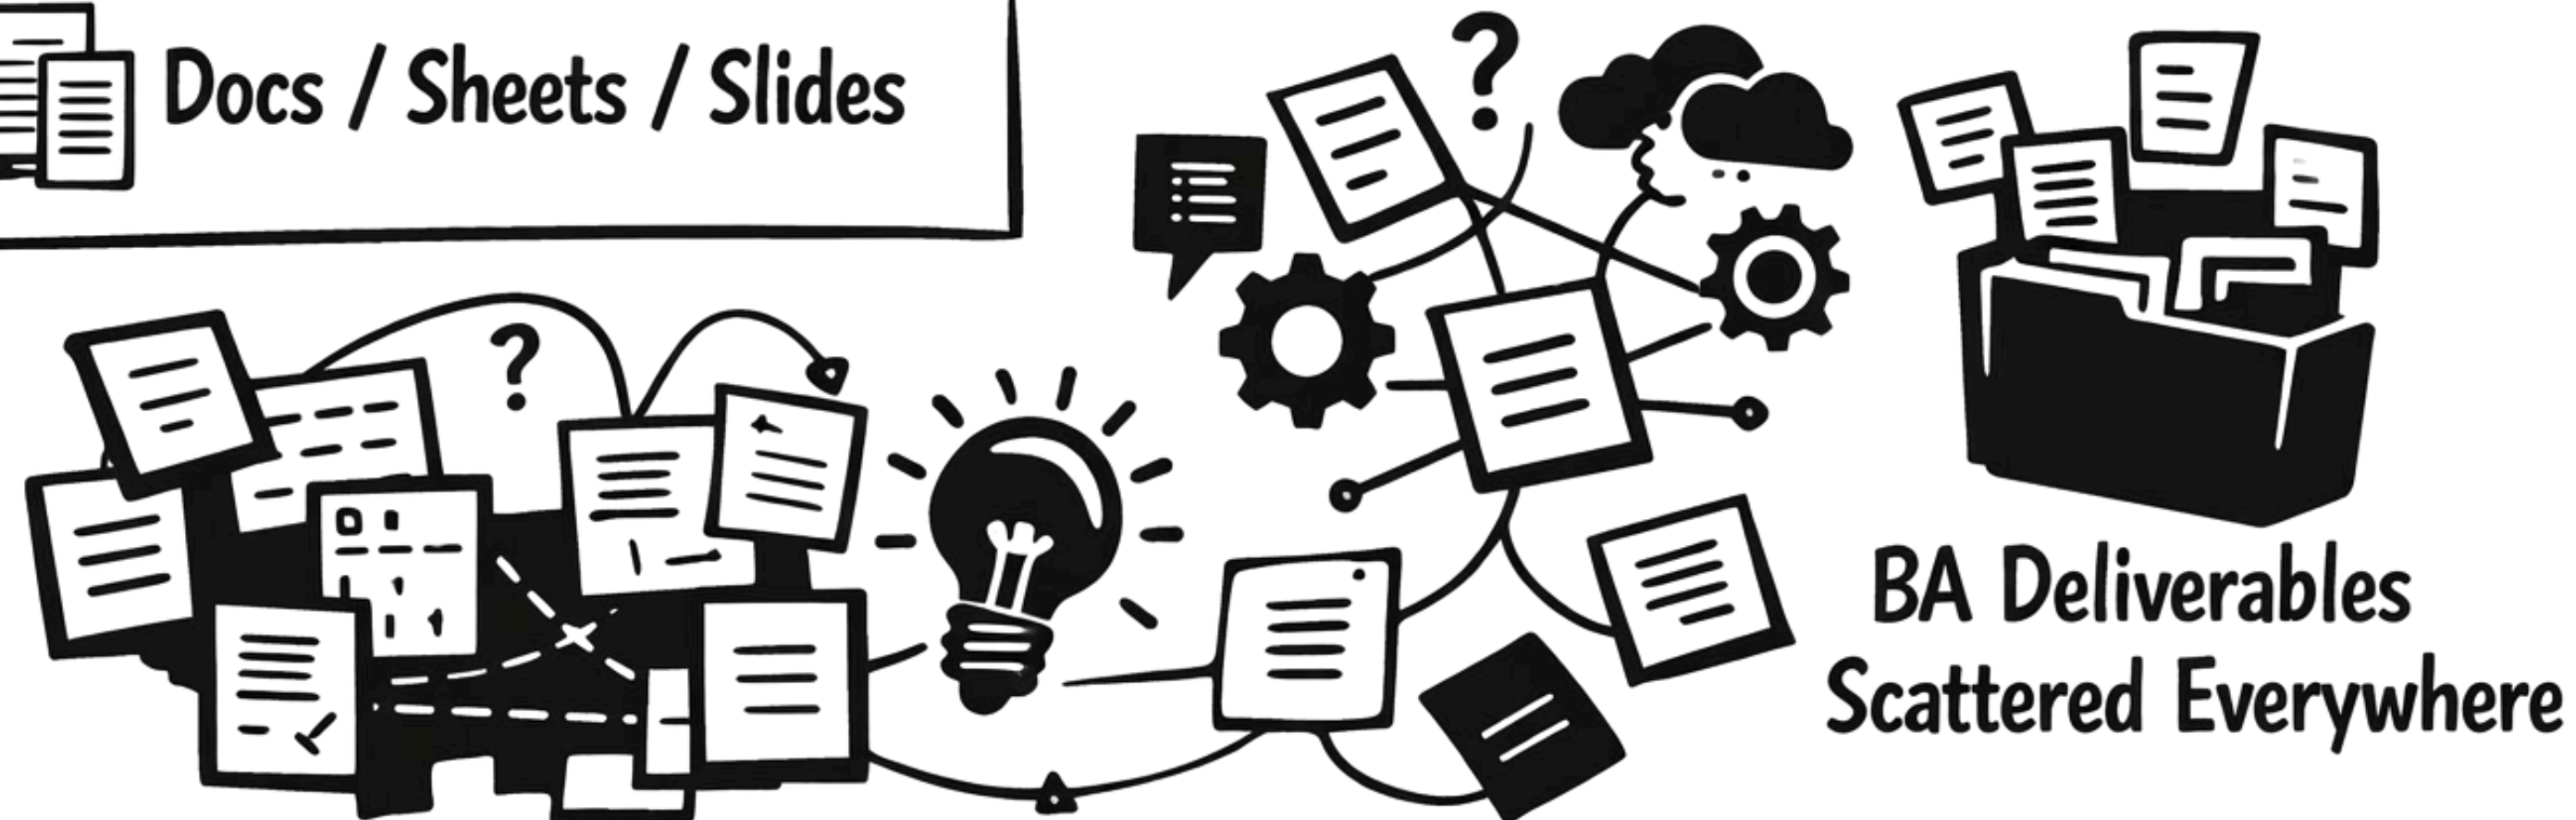

Requirements Scattered

-  Slack
-  Figma / Pencil
-  Meeting Notes
-  Docs / Sheets / Slides

Translation Overhead

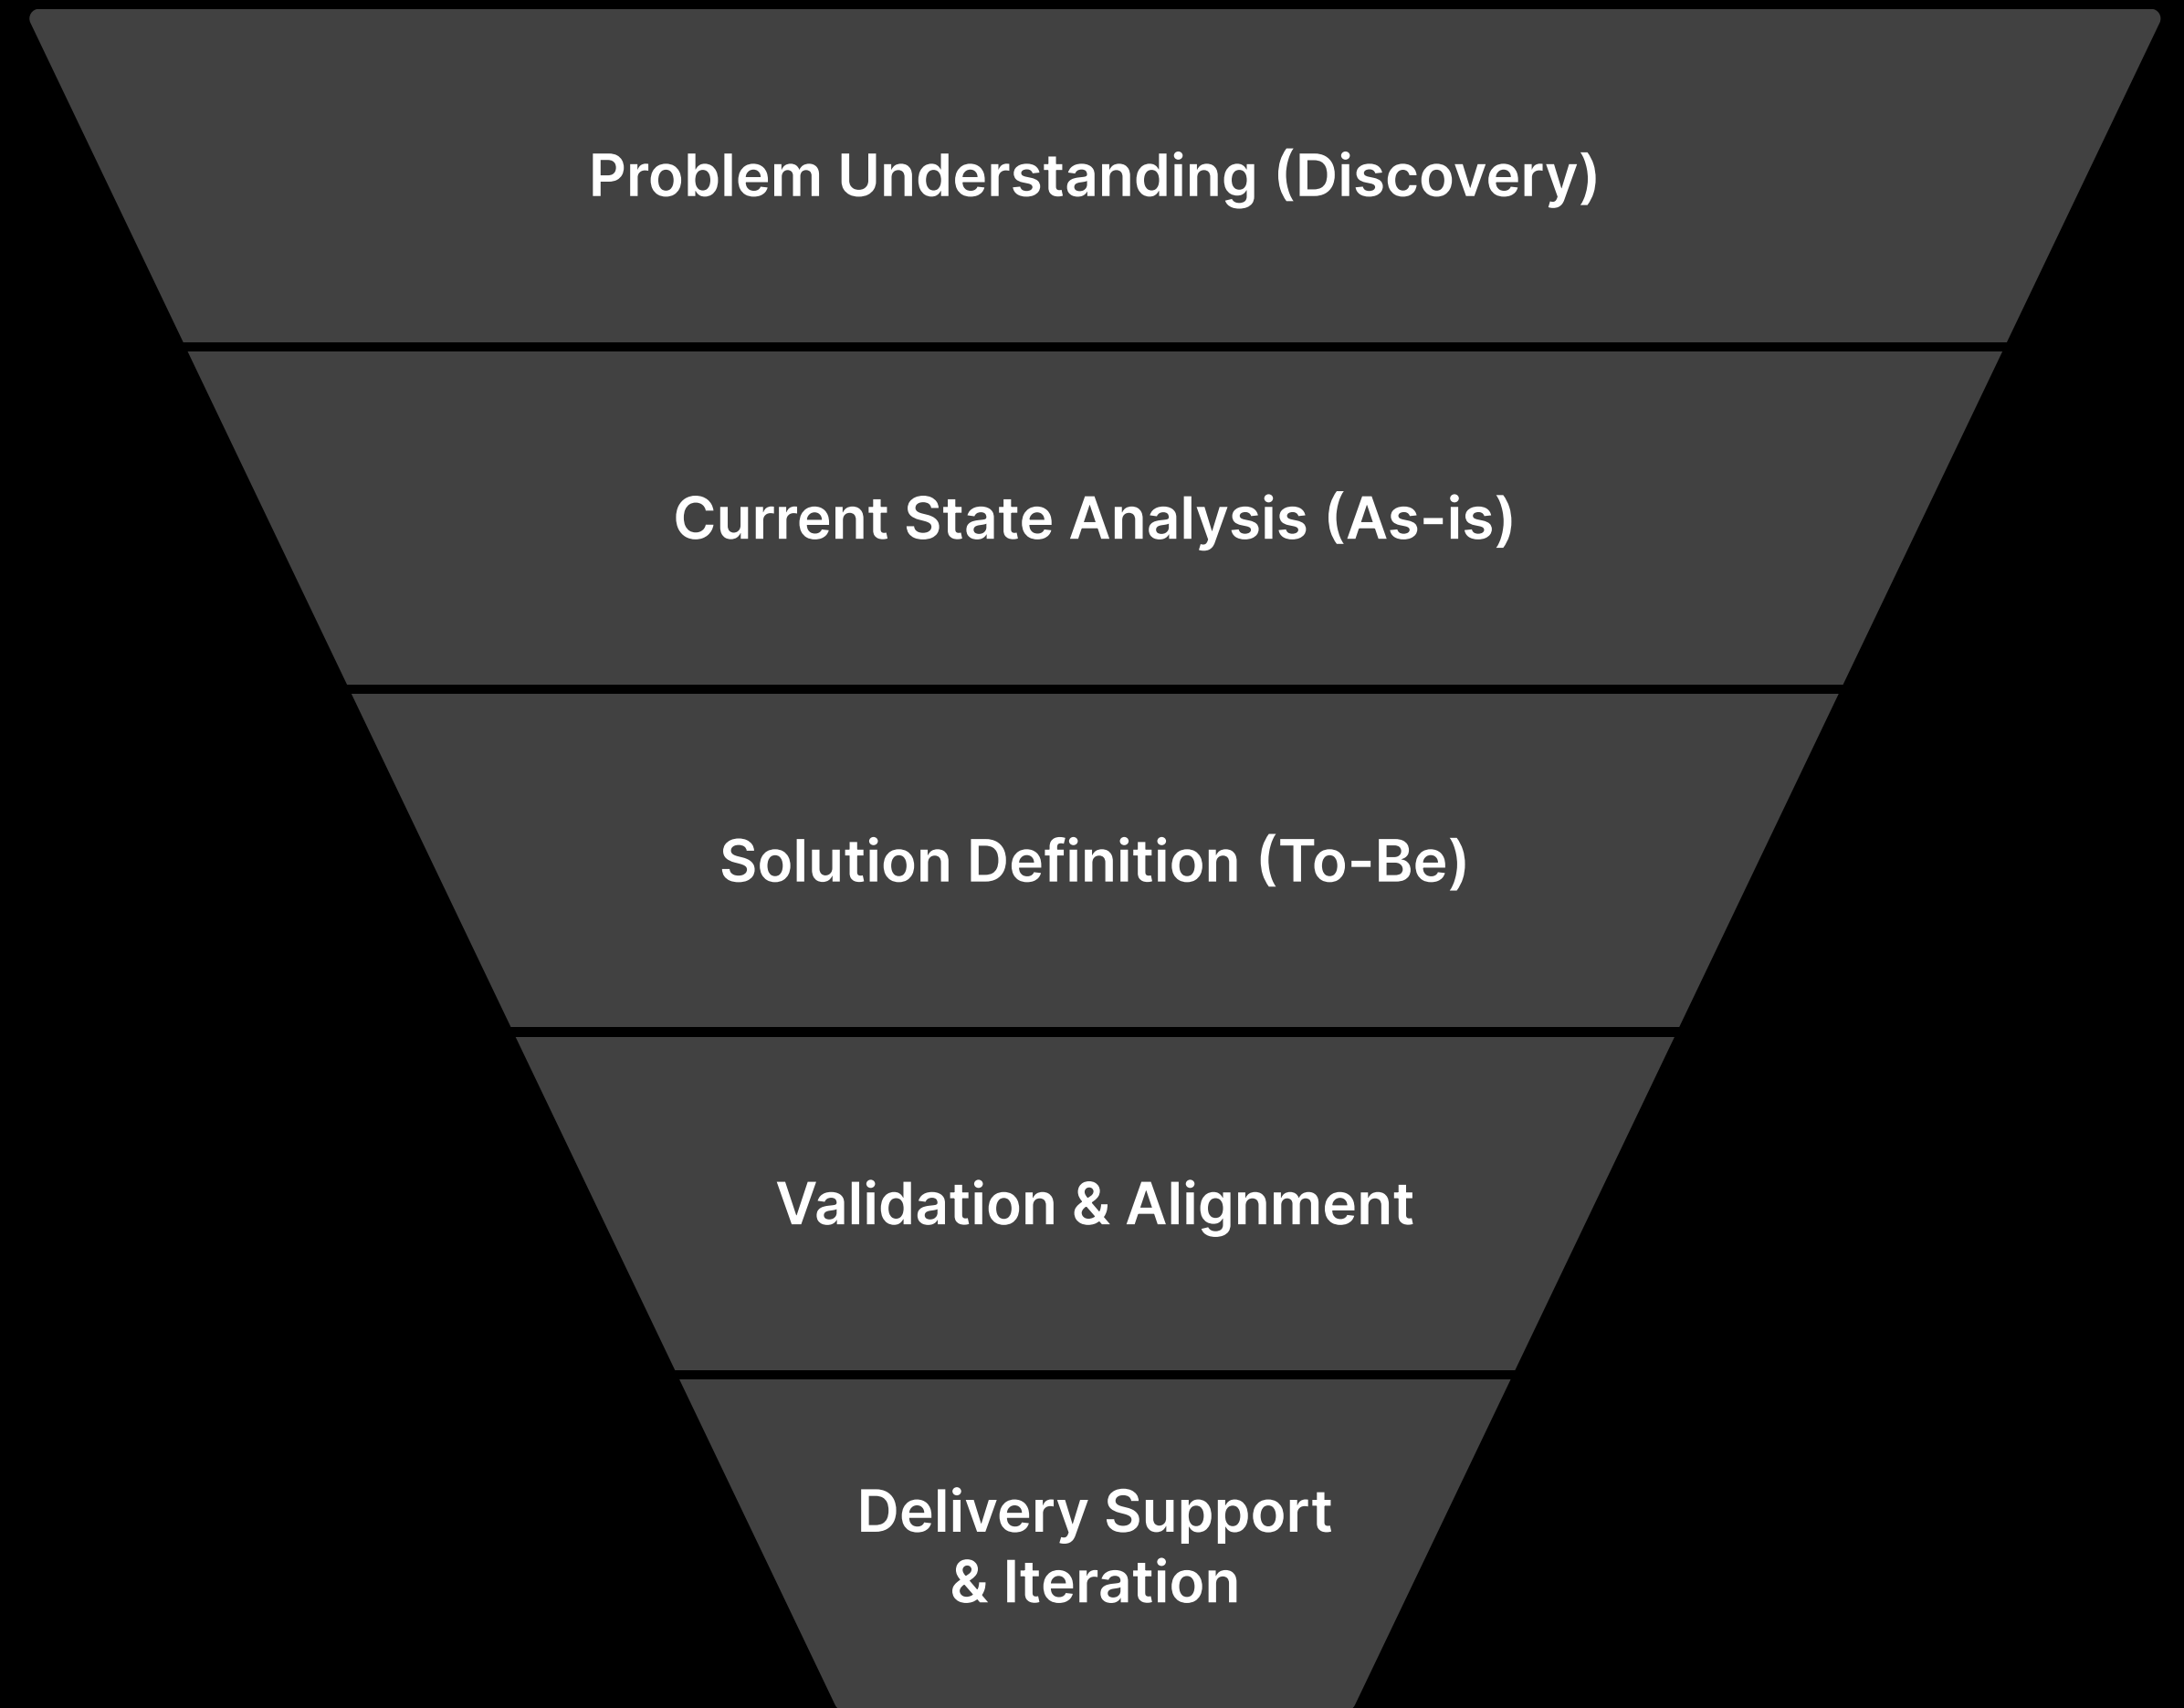

No System of Intelligence

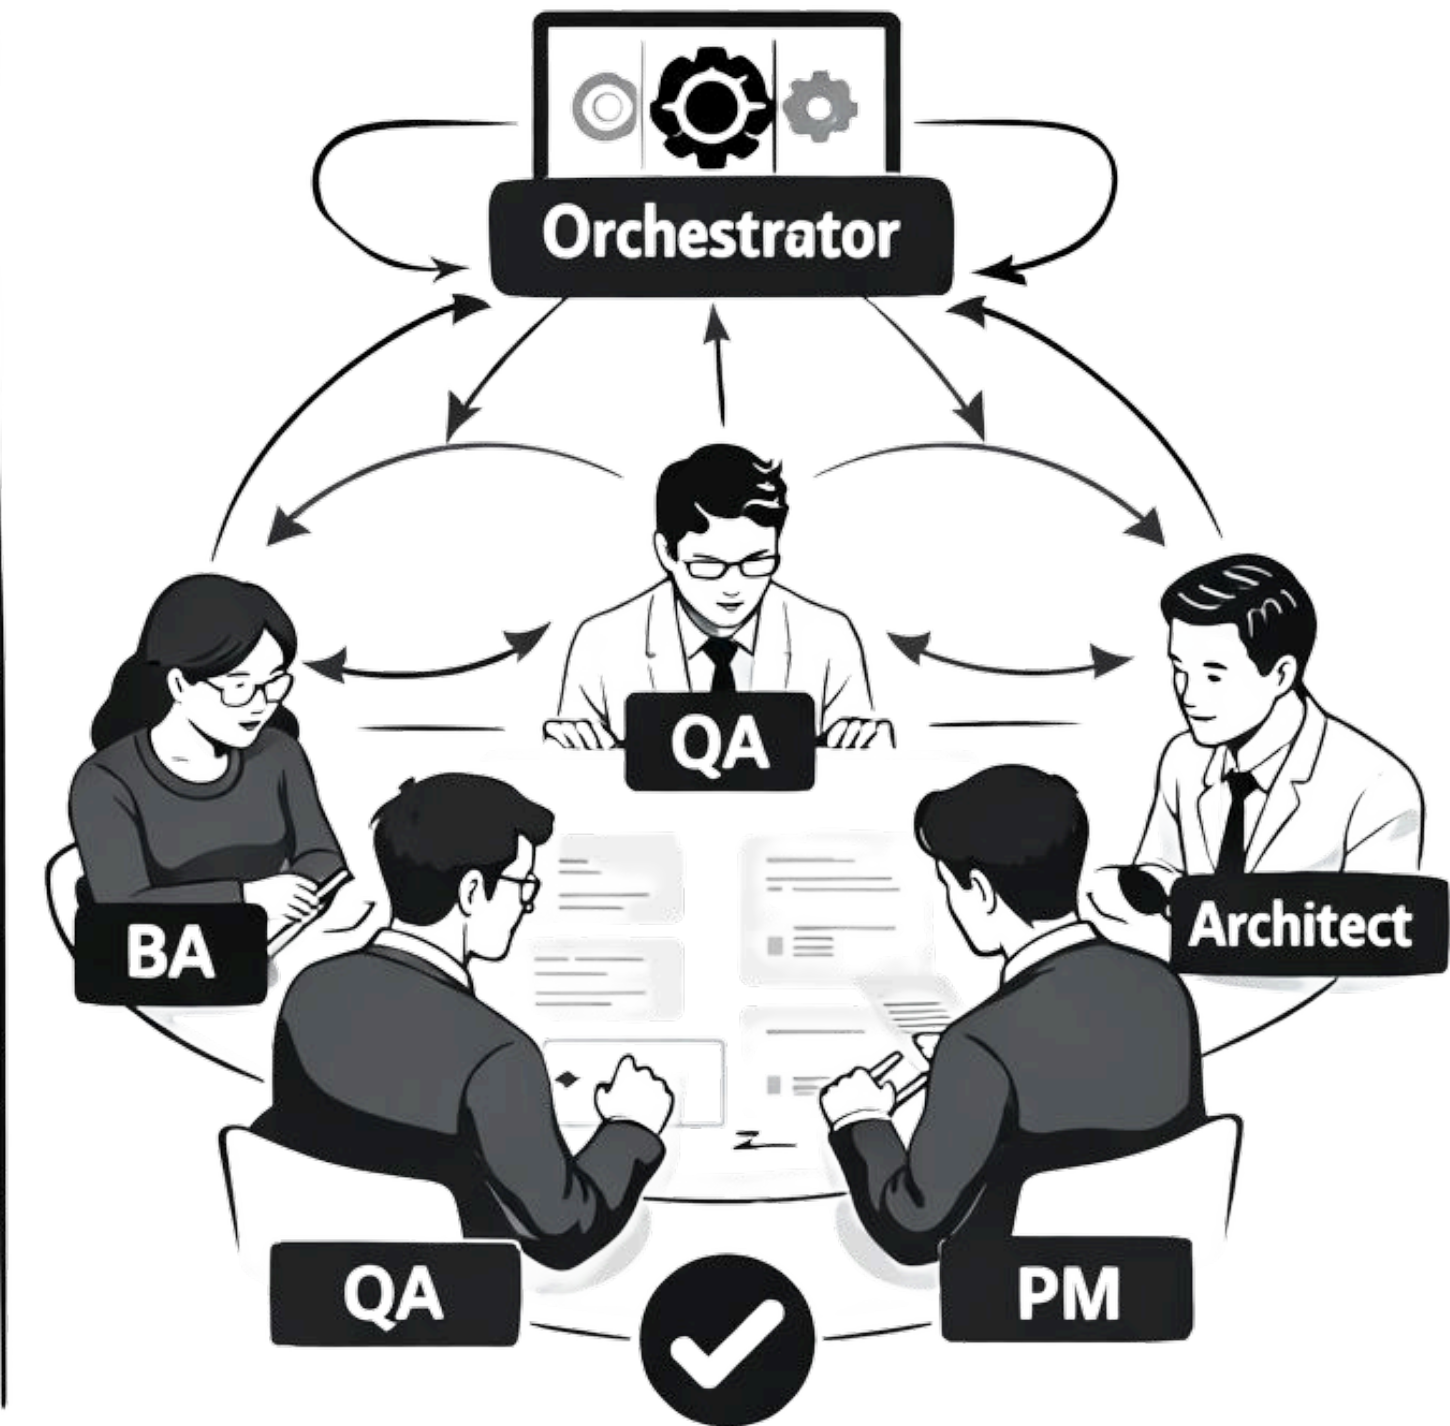

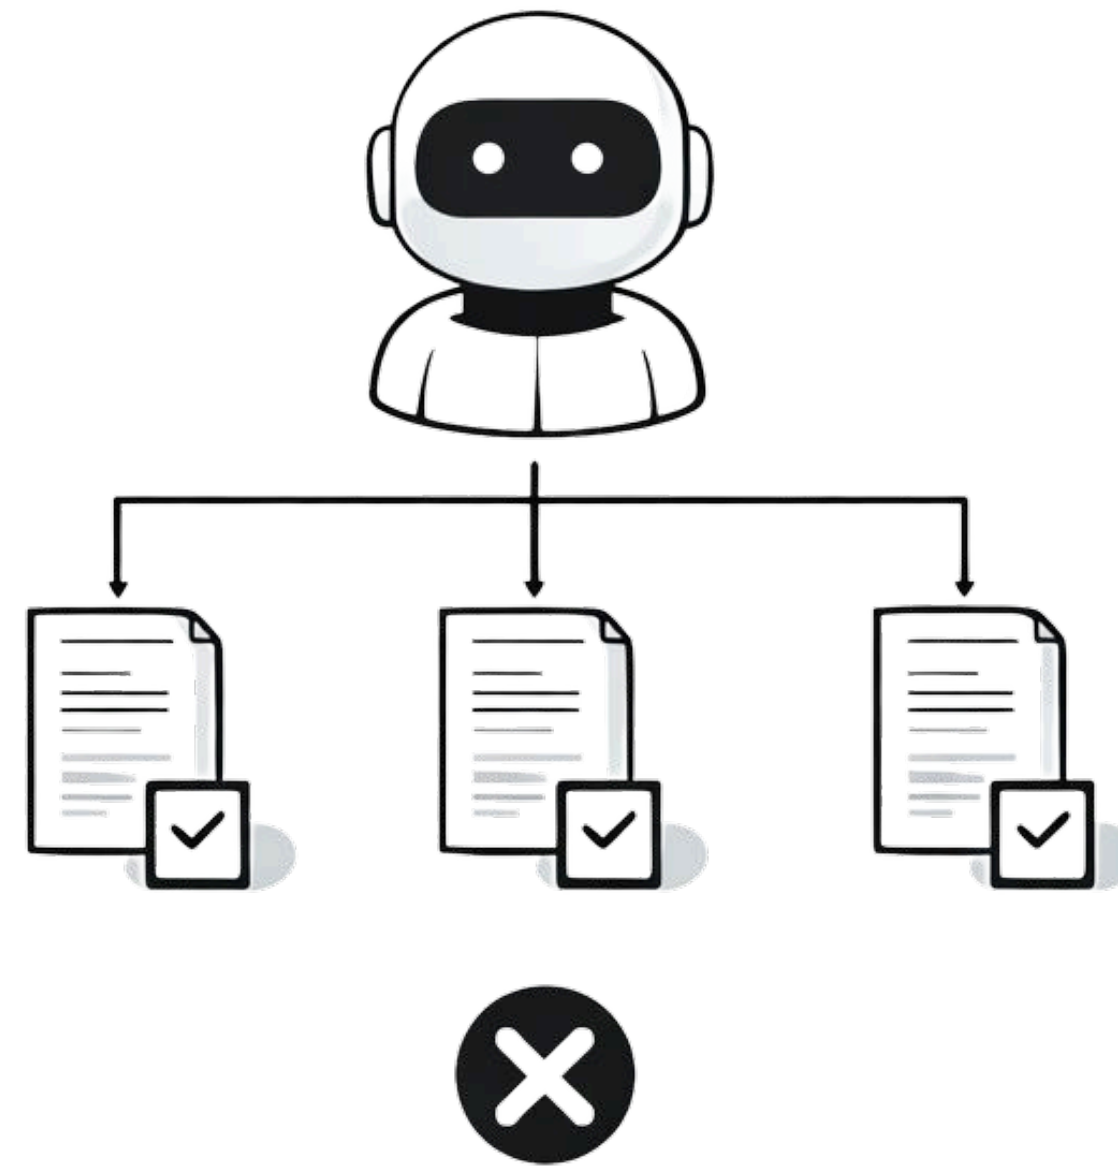

Traditional BA Workflow

Human does everything step-by-step

BA Workspace

- Intent
- Context
- Logic
- Artifacts
- and structured thinking

Validated Decision

Infrastructure

What Makes Agent Systems Reliable

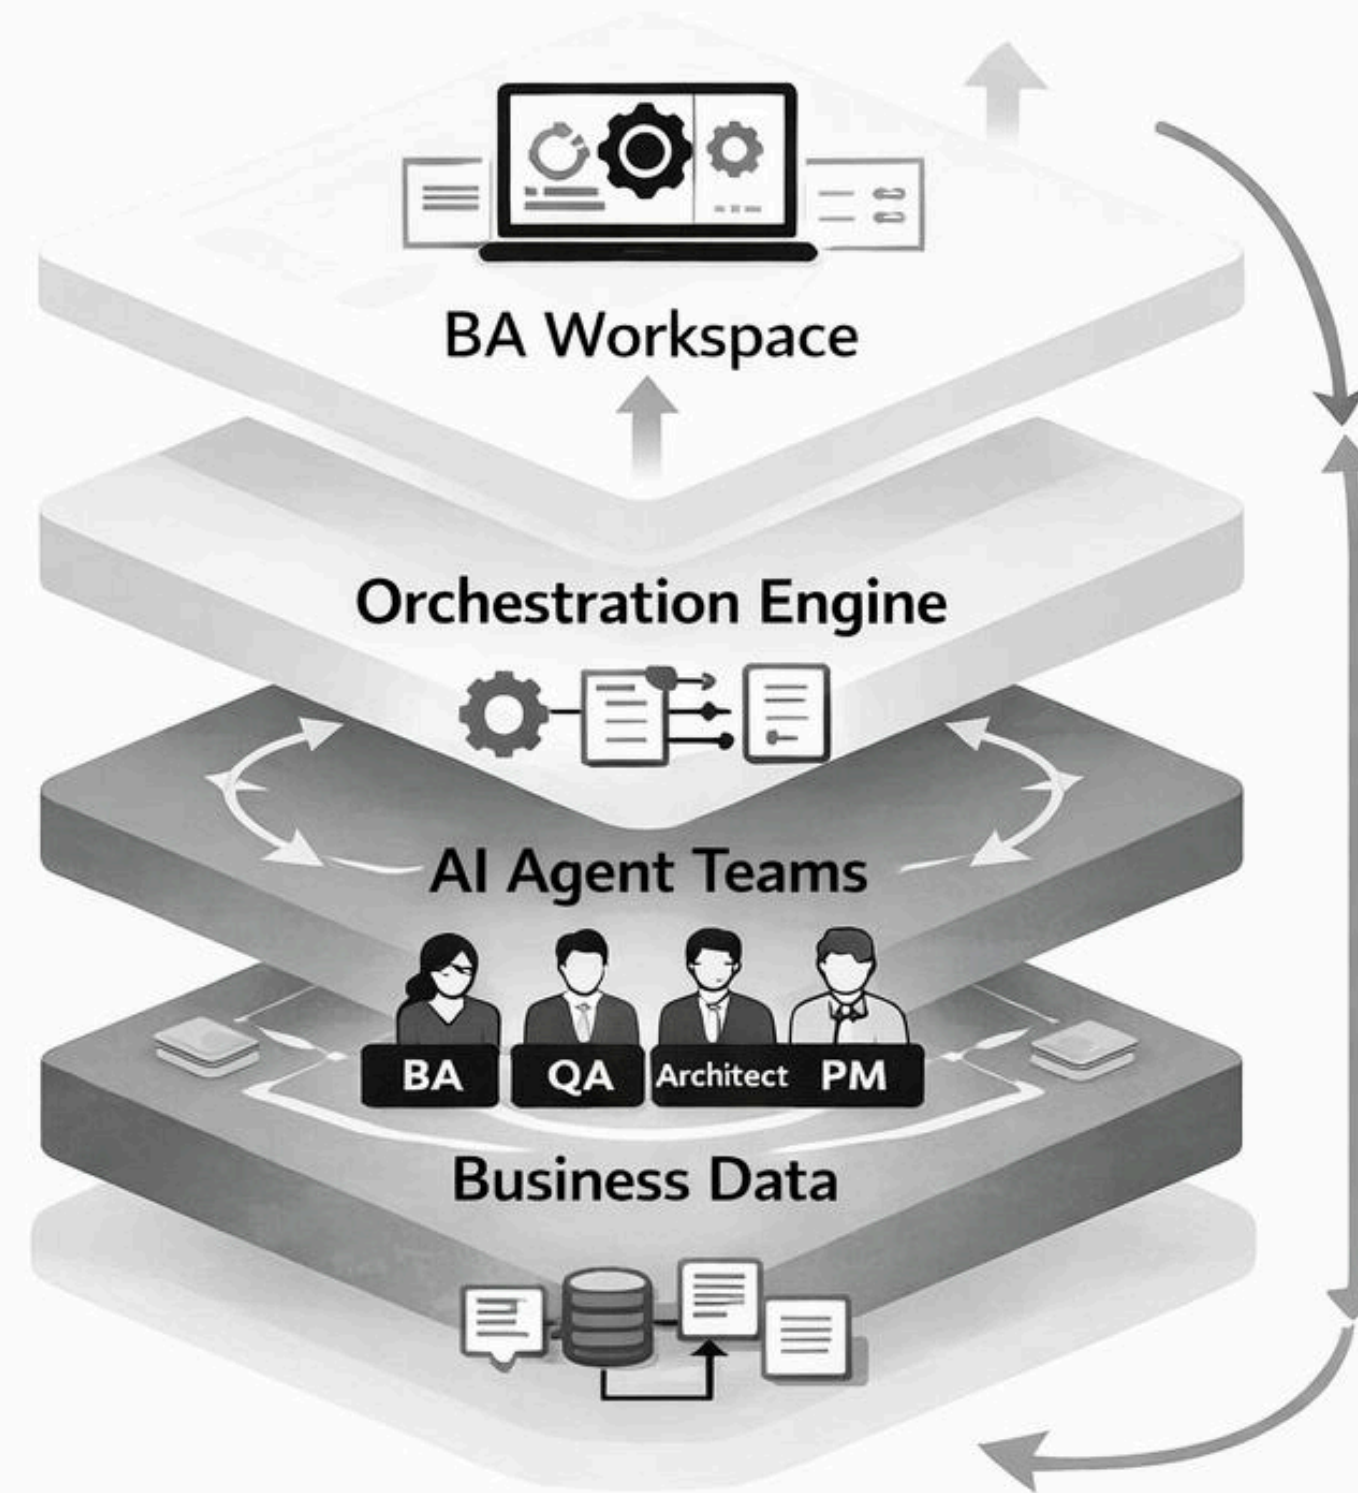

1. Knowledge layer → grounded in real data
2. Reasoning layer → structured prompts + roles
3. Feedback loops → continuous improvement
4. Evaluation → measurable output quality
5. Governance → safe + controllable

Our Mental Model

From analysis → to a system that thinks

We build a system that thinks, debates, and validates decisions.

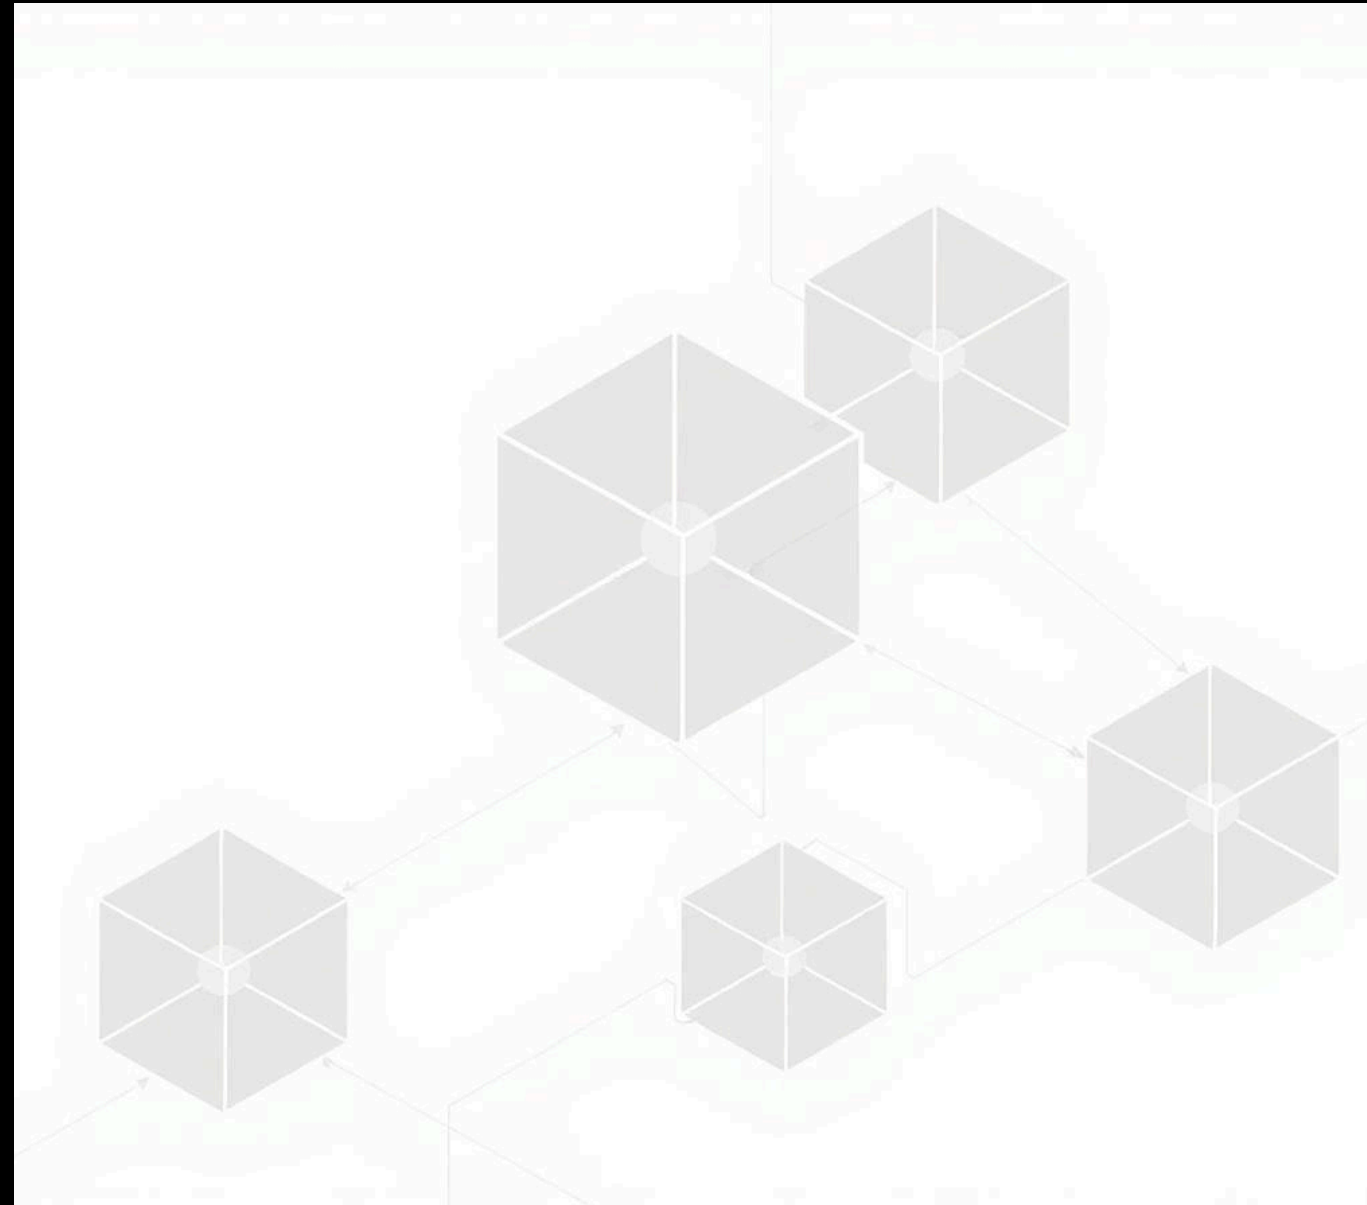

- Agent Teams (not one AI)
- Orchestration Engine
- Domain Templates
- Local Data Integration
- Continuous Improvement

- Agent Teams (not one AI)
- Orchestration Engine
- Domain Templates

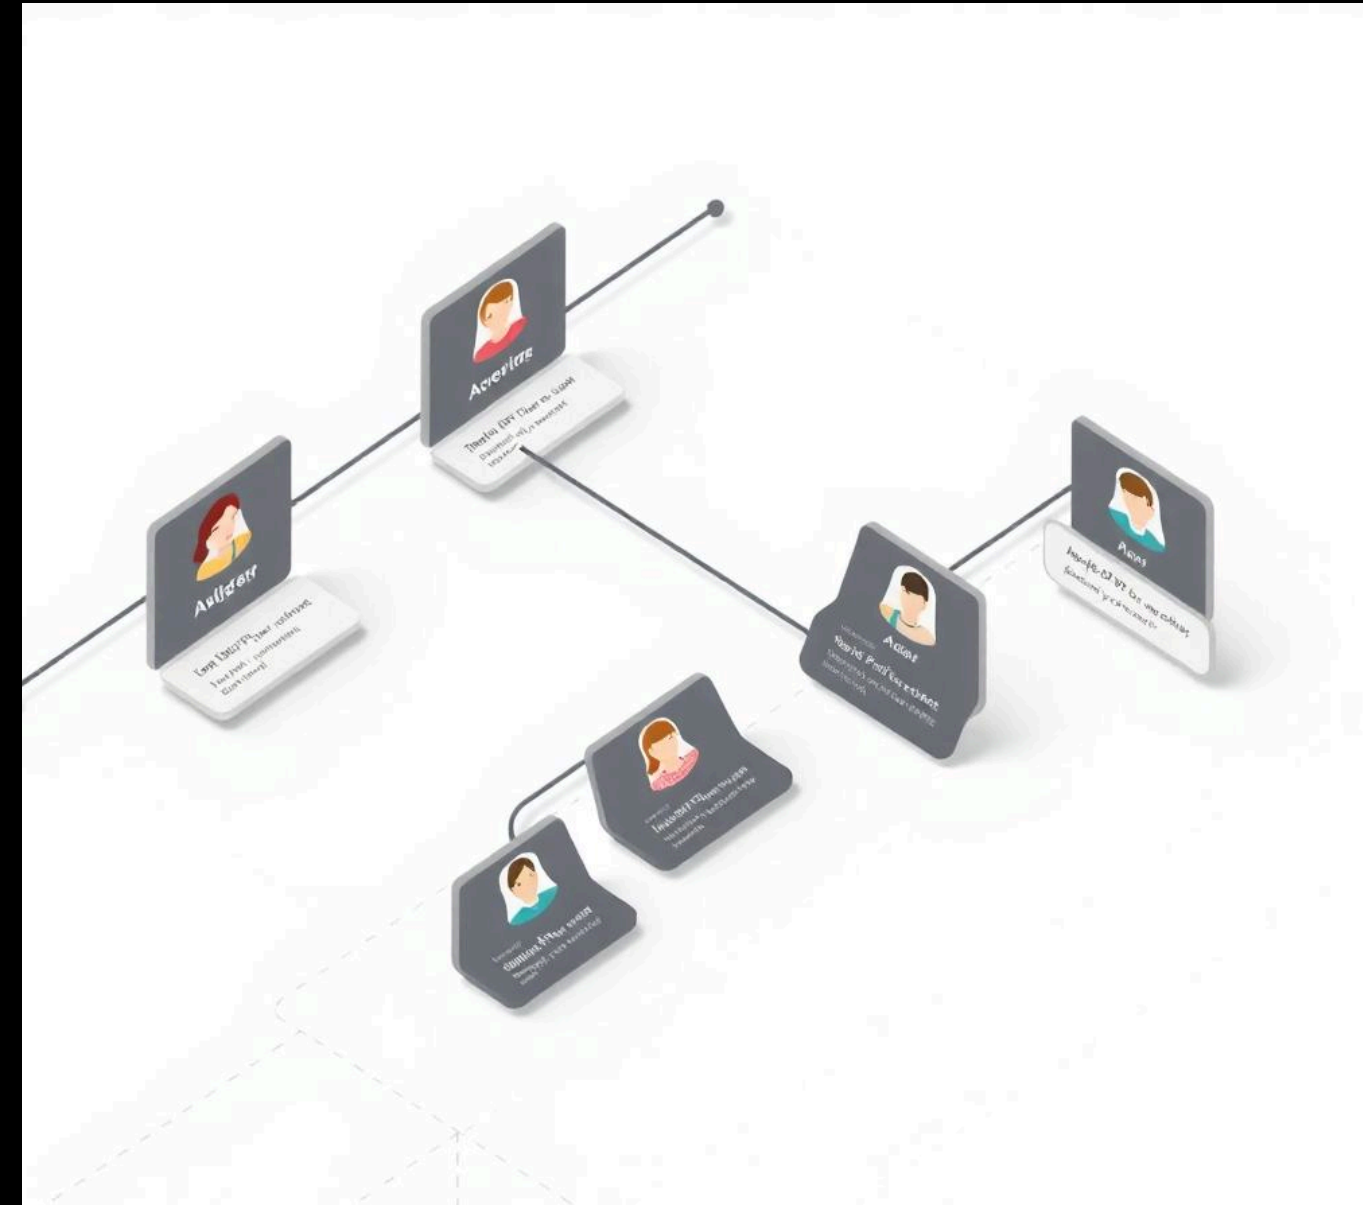

It's a system that performs business analysis.

Structured, Collaborative Architecture

Project Spaces

Dedicated environments for specific company projects.

The Agent Team

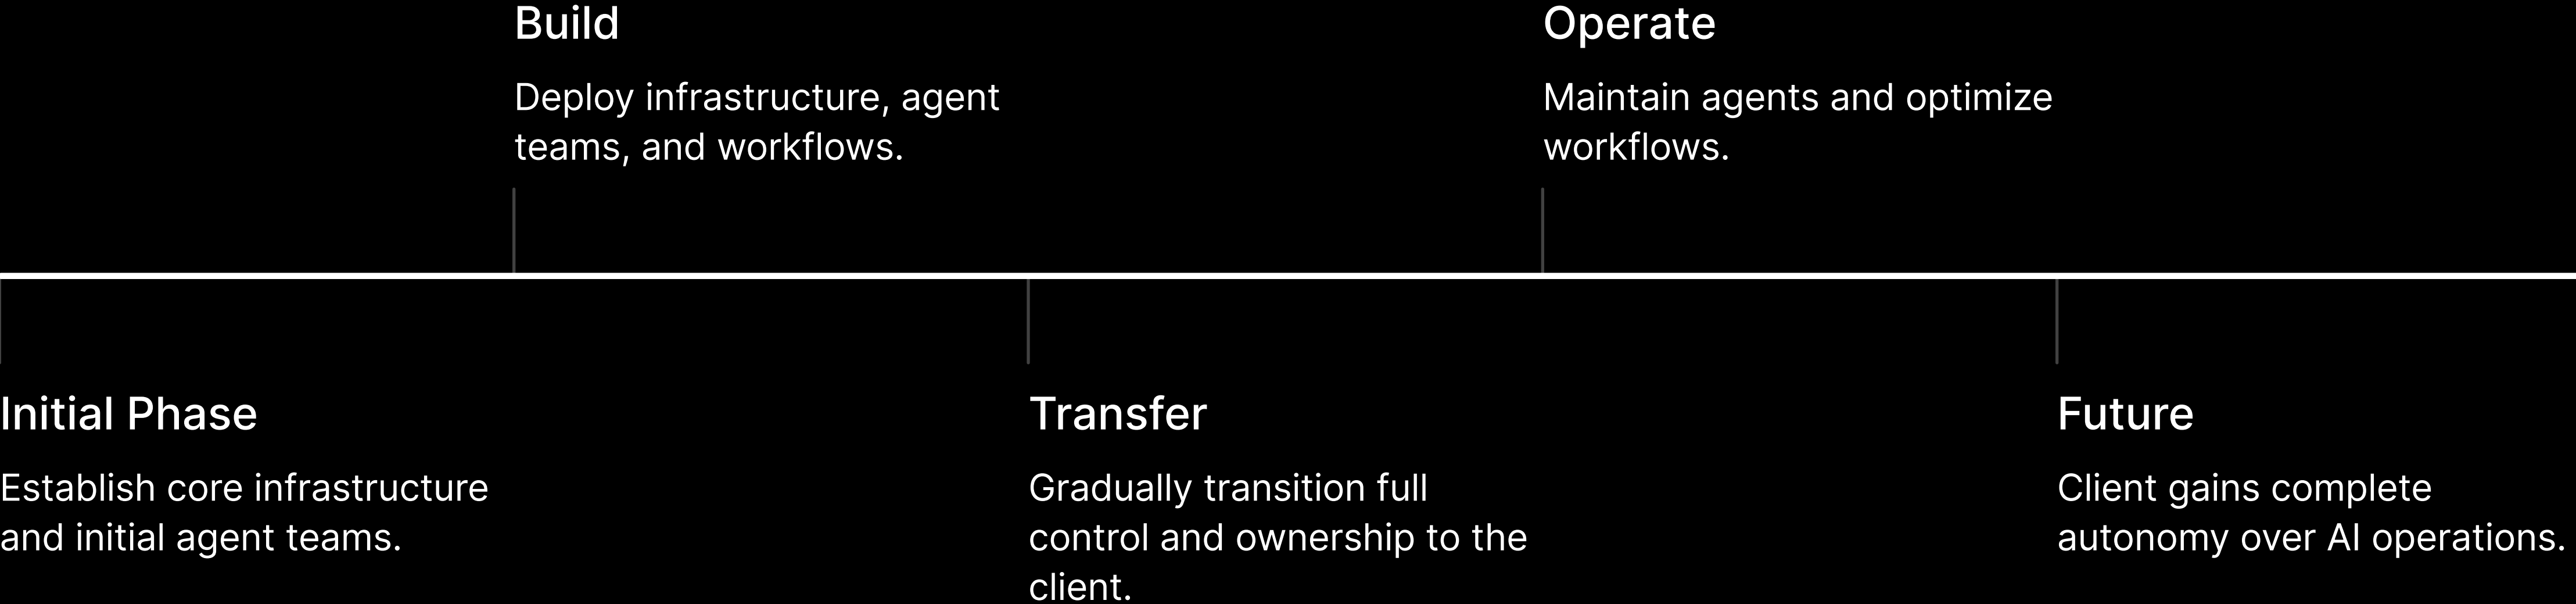

Agents focused on business analysis cycles.

Shared Memory

- Working Memory
- Knowledge Memory
- Episodic Memory
- Decision Memory

Build Operate Transfer Model

Ownership Model

Owned Infrastructure

Your company controls the hardware and software stack.

Owned Workflows

Agent processes are customized and owned by your business.

Owned Knowledge

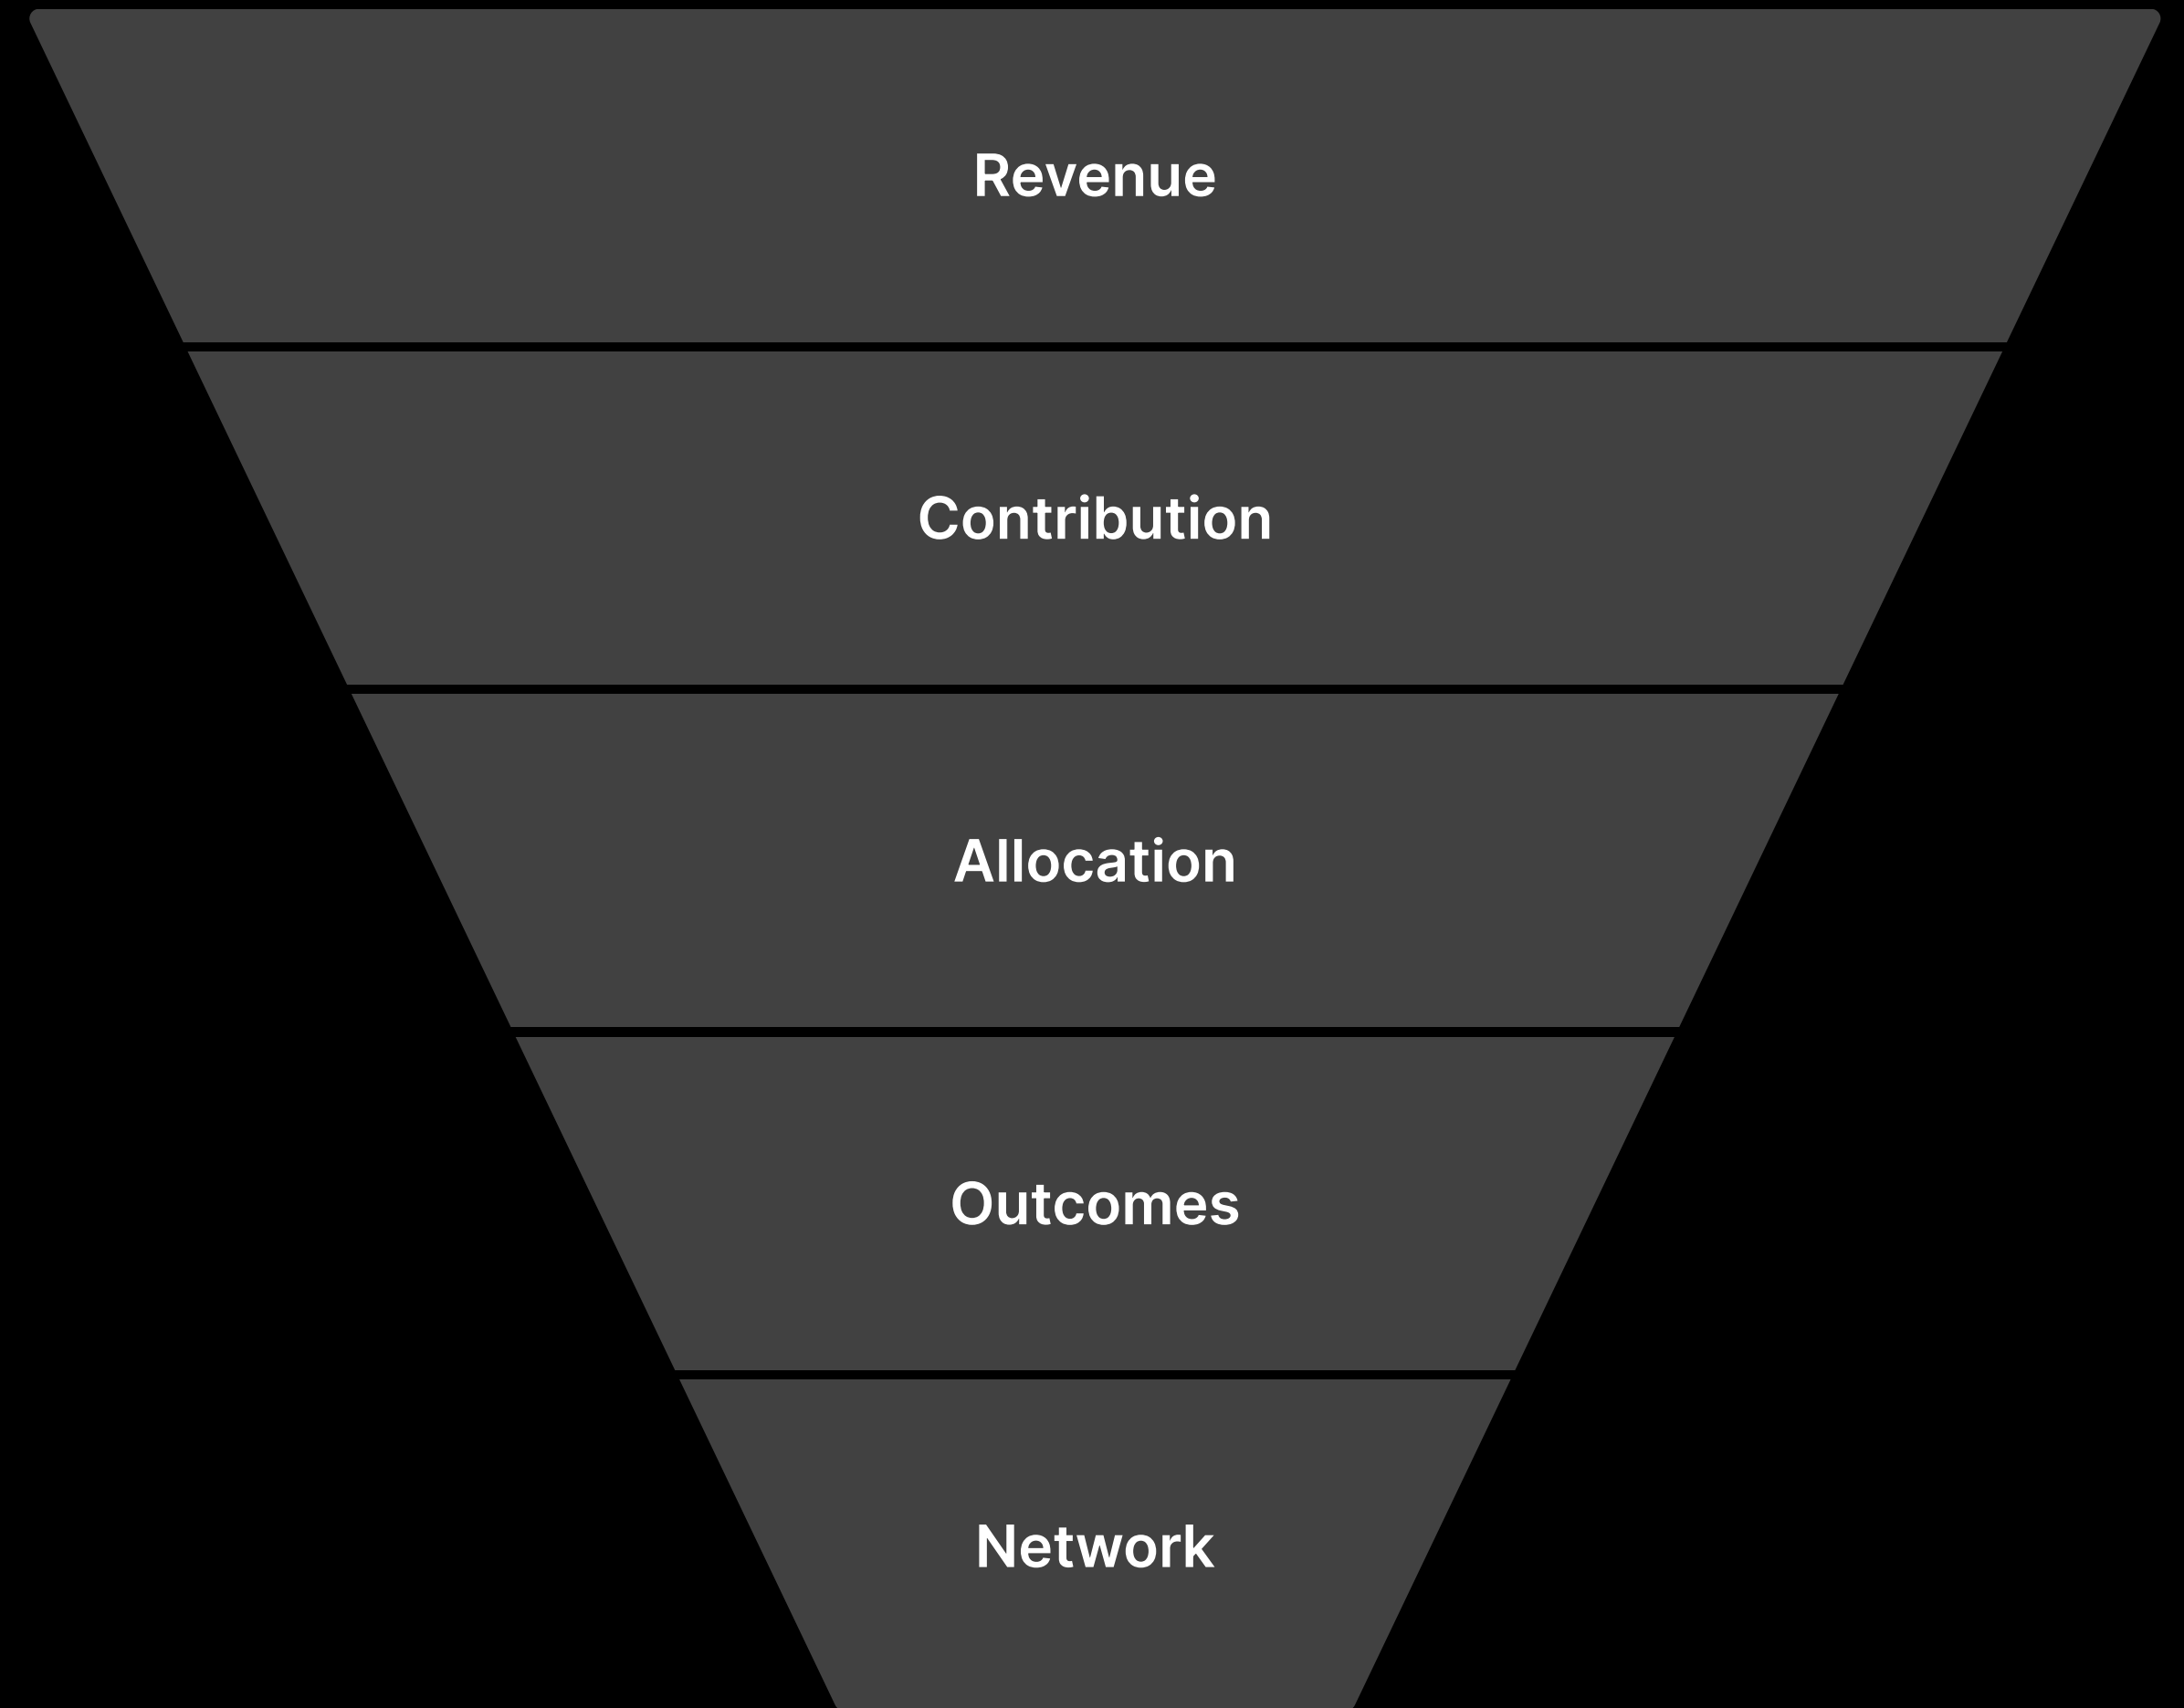

Your proprietary data and insights are secured locally.

Internal Capability

Develop a core AI competency, not a SaaS dependency.

Revenue Sharing

Client revenue fuels a system rewarding contributions to AI team success.

Contribution Economy

Agent Design

Input on new agent capabilities.

Workflow Optimization

Improvements in agent task execution and collaboration.

Infrastructure

Contributions to node performance and reliability.

Domain Expertise

Integrating company-specific knowledge for better results.

Target Customers

- Founders and CEOs.
- Digital agencies.
- Consulting firms.
- E-commerce operators.
- Media companies.
- Tech startups.

Market Opportunity

Significant market potential across various sectors.

300k+

Digital Agencies

700k+

Consulting Firms

1M+

E-commerce

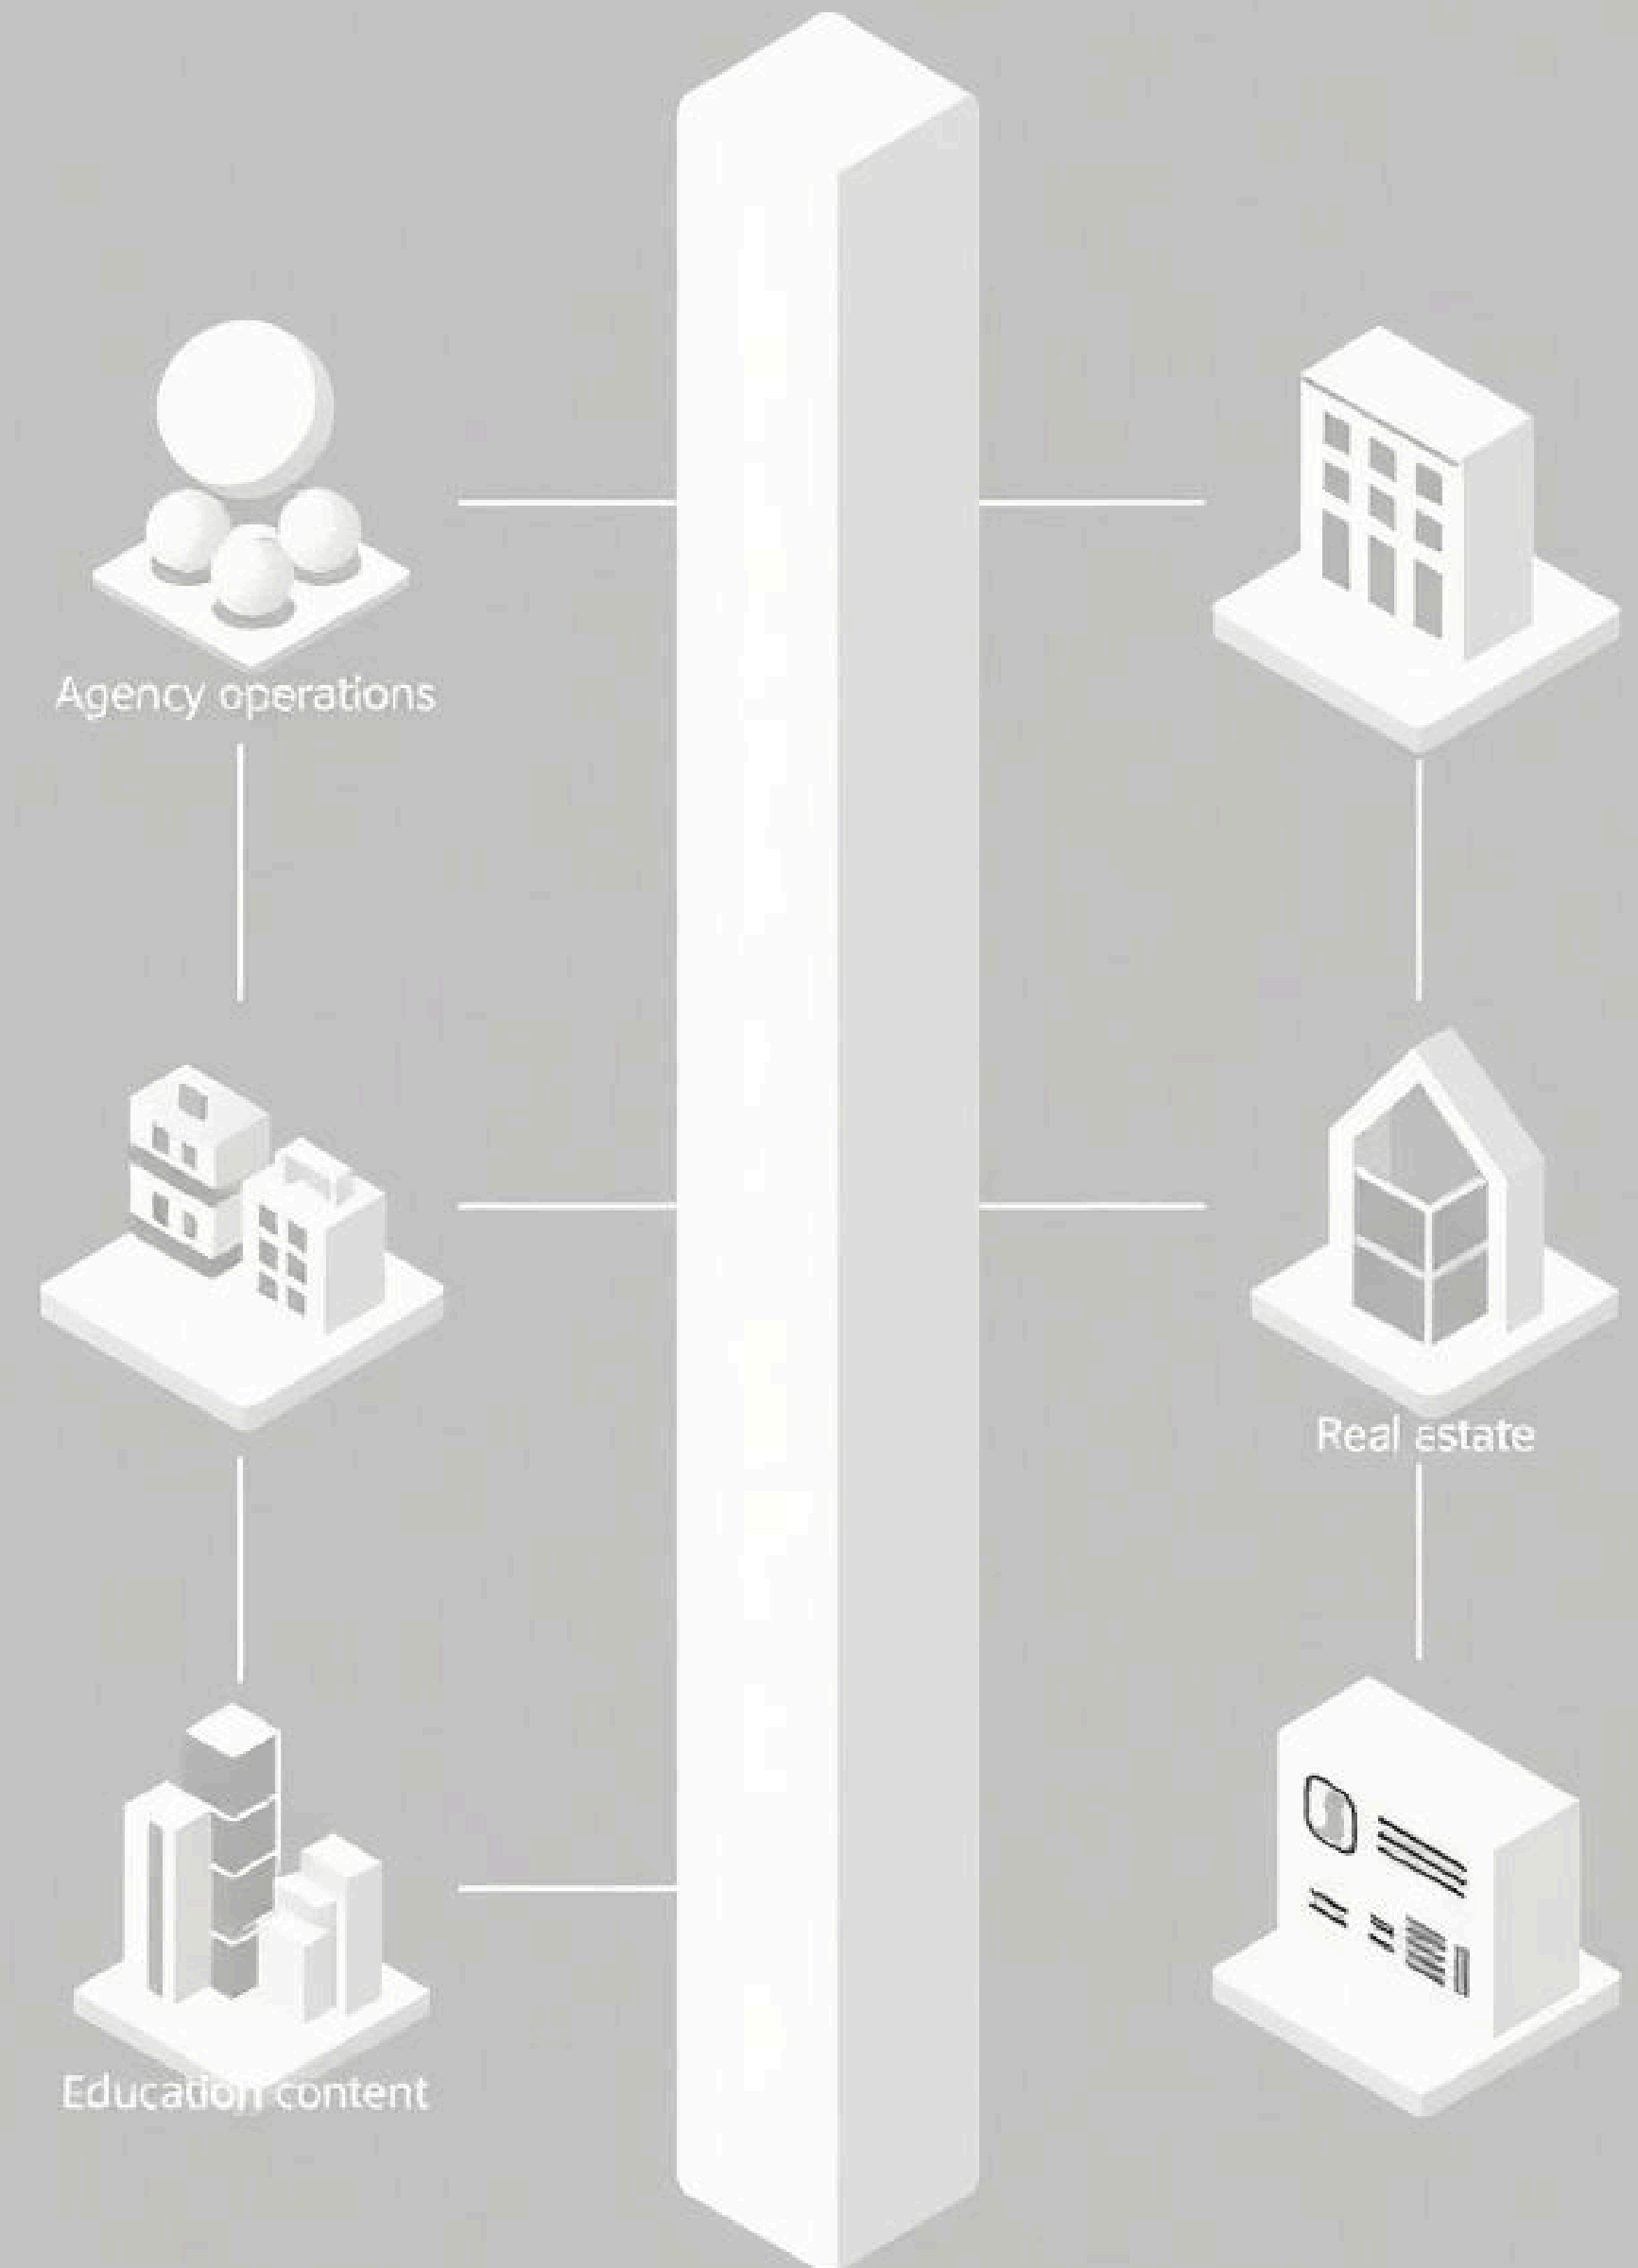

\$250M+

Example Scenario

Expansion

Vertical Teams

Specialized AI teams tailored for industry-specific needs.

Future Vision

A connected network of AI-operated companies. Local agent teams collaborating via a contribution network, accelerating collective capability. AI as the next operational workforce layer.
